Welcome to Company Car in Action 2018

I'm delighted to welcome you to the UK's biggest and best fleet driving show.

This year we have 26 manufacturer brands and around 300 models – everything from core fleet models such as the Ford Fiesta and Audi A3, to the eye-catching Abarth 124 Spider, Porsche Panamera and Range Rover Velar.

We have exclusive first drives of the Mercedes-Benz A-Class, Jaguar I-Pace and Volvo V60, plus a first look at a static Porsche Cayenne E-Hybrid, Peugeot 508 and Ford Focus. And, we showcase the latest electric and plug-in hybrid cars in our feature zone in the main building, with experts on hand to advise you on the best choices for your fleet.

As ever, you get to test the cars on a variety of courses, from the challenging alpine hill route to the high-speed bowl. For a more realistic, every-day experience, try the city course, while a selection of 'mud-pluggers' will be waiting for you to try your hand at off-roading.

Each day we are running a 'Great Debate' looking at how you can effectively incorporate plug-in hybrids and electric vehicles into a company car scheme.

Don't forget to visit Glass's for residual value comparisons to help you finalise your fleet list.

Enjoy your day and share your experiences with us on Twitter @CCIA2018 using #CCIA18.

Best wishes

Steve

2018 PARTNER SPONSORS

ANNOUNCING THIS YEAR'S FIRST UK DRIVES

Volvo V60

Mercedes-Benz A Class

Nissan Leaf

Mini Hatch

Jaguar I-Pace

STATIC EXCLUSIVES

Porsche Cayenne E-Hybrid

Renault Megan R.S.

Peugeot 508

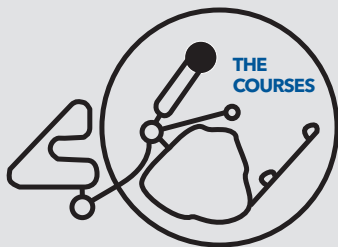

Ford Focus

BMW i8 Roadster

The City Course

On the three quarter mile city course, you will be able to experience the reality of stop-start urban driving.

The Hill Route

Familiarise yourself with vehicle braking and handling on this challenging route which features three loops, totalling over four miles, with gradients from 6.5% to a challenging 26%.

The High Speed Bowl

The chance to drive and be a passenger in executive fleet models from the big marques is available on Millbrook's five lane, two mile, banked high speed bowl, where realistic motorway driving can be simulated in a safe and secure setting.

The Off-road Course

Put the latest off-road vehicles through their paces on this purpose built course to see how they cope with various terrains.

Which boxes will you tick?

Create your preferred choice list in advance from the extensive range of models at Company Car In Action 2018.

EV/HYBRID REVIEW ZONE

Sponsored by chargemaster
powering the future

Evaluate the latest electric and hybrid vehicles back-to-back in CCIA's EV/Hybrid Review Zone. Industry experts from leading manufacturers and key suppliers will be on hand to discuss the shift to new fuel technologies, giving you invaluable insight into the viability of an ultra-low emission fleet.

Supported by

BMW 225XE PLUG-IN HYBRID

FORD MONDEO HYBRID VIGNALE

JAGUAR I-PACE FIRST EDITION

KIA NIRO PLUG-IN HYBRID

SMART EQ FORTWO ELECTRIC DRIVE

NISSAN LEAF

PEUGEOT PARTNER ELECTRIC

FREE TO ATTEND DEBATES

Tuesday: 10.30am

Running a low emission fleet - the options

This session will look at how fleets can adopt electric vehicles; what factors they need to consider; which fuels are right for which type of journey; and the practical experiences from fleets that have made the investment. It will also look at the range of vehicles on the market, from hybrid to plug-in hybrid to full electric to hydrogen fuel cell, and provide the link between theory and practice by highlighting the vehicles available to drive on the steering pad.

Wednesday: 10.30am

EV investment - help is at hand

What grants are available to fleets looking to invest in electric vehicles? This session will cover all the financial support offered to fleets looking to add EVs to their operations, from plug-in grants to charge points, and will also cover the benefits in BIK to drivers and NIC to fleets, plus the wholelife cost argument to give the full financial picture.

FEATURES

Off-road Course

Put the latest off-road vehicles through their paces on Millbrook's purpose built course to see how they cope with various terrains. Including challenging inclines and descents and terrain surfaces of dirt, gravel and mud, this circuit pushes off road vehicles to the limit to see what they're capable of.

Free Residuals Forecasts – Glass's Valuation Zone

Glass's....
Part of Autovista Group

The experts from Glass's will be on hand to provide free residual value forecast data on every car being presented at the event. Take away all the information you need to make considered decisions on the future of your fleet.
